

AI in Practice: A Predictive Model

Ensuring Safety with AI

Ari Lightman, Professor Digital Media and Marketing
Sean Beggs, Director, School Of Information Systems

Carnegie Mellon University
HeinzCollege
INFORMATION SYSTEMS • PUBLIC POLICY • MANAGEMENT

- Professor, Digital Media and Marketing
- Faculty Lead: CDigO Executive Education Program
- Commercialization and Marketing Advisor, CMLH
 - Co-PI, Inst. For Patient Safety Research
 - Ai Research, Crypto Research

Background: Start-ups, VC, Management Consulting

Ari Lightman

Director

- Master of Information Systems Management
- Master of Information Systems Management – Business Intelligence & Data Analytics
- Background: Jet Engine Mechanic; Technology Management & System Administration

Sean Beggs

Heinz College Profile

- Two Distinct Schools
 - School of Public Policy and Management
 - School of Information Systems and Management
- Heinz Curriculum Elements:
Systems Thinking + Technology + Analytics + Capstone Project
- INFORMS UPS Smith Prize for best data analytics program
- 70 faculty (30+) with expertise in IT Systems Management (AI, ML, Data, Software)
- 100 capstone projects a year with public, private, and non-profit sectors

Engaging with Heinz College

Recruit Our Students

Engage In Research

Up-Skill Through Executive Education

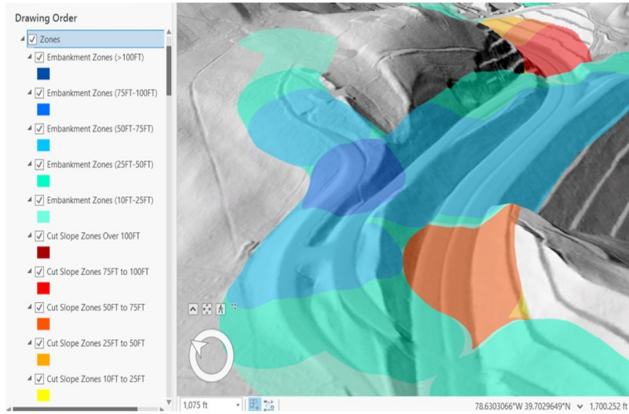

Sponsor A Capstone Project

US DOT National
University Transportation Center for Safety

Improve highway and transportation safety by reducing landslide risks

Improve Highway Construction Safety by workzone gesture detection

Carnegie Mellon University

Center for Innovation in Health

- Institute for Patient Safety Research

Manufacturing Futures Institute

The Digital Transformation of Manufacturing

Innovate with our Capstone Program

- Team of 4-6 students led by a faculty expert
- 15 weeks (Fall, Spring, Summer)
- No Fee – We Invite a Philanthropic Gift; \$10,000 or more qualify for recognition through our Heinz Corporate Partners Program

How Does a Capstone Serve Your Team?

- Students Can Create a **Customized Business, Policy, or Technology Solution**
- Potential to **Receive a License to the Team's Work Product** on Your Platforms
- Create a **Talent Pipeline**
- Collaborate with **Faculty Experts**
- Potential to Elevate to **Capstone+**

Real Impact

Regional Impact with Iconic Brand

Over the last 5 years, our students contributed to **Bayer** Radiology's vision for a cohesive patient experience that prioritizes early detection and prevention

Intersection of Policy and Technology

Our students helped code a large language model with **Bipartisan Policy Center** so that lawmakers can access and analyze legislation, while training AI models to support projects that ultimately drive policy across government

Government Impact and Global Reach

Our students built a prototype of a data pipeline to support the **National Geospatial-Intelligence Agency (NGA)** combat illegal, unreported, and unregulated (IUU) fishing

Heinz College Capstone Spotlight

- PA Department of Labor & Industry
 - Goal: Reduce injury claims & costs ; improve satisfaction
 - Result: Analytic System (data integration, prediction, visualization)
- Spanned multiple semesters
- Graduate students developed & improved system

Take Action

- Summer Semester (May-August)
Proposals due **April 30**
- Fall Semester (August-December)
Proposals due **July 1**
- Spring Semester (January-May)
Proposals due **November 1**

What's New @ Heinz College

Master of Artificial Intelligence Systems Management
(MAISM)

Master of AI Systems Management: **The CMU Advantage**

Leveraging...

- CMU's reputation as a trailblazer in Artificial Intelligence
- Heinz faculty prominence in AI policy, governance, and responsible AI
- PwC Center for Digital Transformation, the Block Center for Technology and Society, and our existing employer relationships
- Ecosystem of partners in our CIO, CDO, CDigO, and CISO Exec Ed programs
- Portfolio of AI courses and professional masters' degrees in IT and Data Analytics

The Goal of MAISM

To develop a new generation of AI deployers, strategists, and evangelists. These individuals can address the organizational, technical, and regulatory challenges of operationalizing AI. The focus is on applying AI to solve consequential organizational problems.

Learning Outcomes:

- Apply systems thinking in making organizational AI decisions
- Analyze AI architectures and data management approaches
- Instrument, measure, evaluate and explain AI outcomes
- Employ responsible AI practices & build AI trust
- Apply industry-specific best practices to AI initiatives
- Communicate effectively with stakeholders on AI solutions
- Understand the societal consequences of technological change
- Evaluate the costs, benefits, and risks of an AI initiative
